The Chair's Message

Welcome to October in Cleveland. Statistics show that the weather will get colder and there is a correspondingly high probability that the ground will turn white. There is also at least a 50% probability that Cleveland weather forecasters will be wrong in their forecasts. Such is life in Northern Ohio.

At this month's meeting we will be presenting the 2nd of the 17 Indisputable Laws of Teamwork by John Maxwell. The 2nd law is "The Law of the Big Picture!". Following that presentation we will have a group discussion regarding that law and how it applies or should apply in our respective organizations.

After the discussion we will be presenting the 2nd episode in the "Against All Odds" series. This episode will cover "Picturing Distributions". With this program, students will see how key characteristics in the distribution of a histogram — shape, center, and spread — help professionals make decisions in such diverse fields as meteorology, television programming, health care, and air traffic control. Through a discussion of the advantages of back-to-back stem plots, this program also emphasizes the importance of seeking explanations for gaps and outliers in small data sets.

I would like to than Tom Copeland for volunteering to be our Recertification Chair. For those members filing for recertification please contact Tom at thomascopeland@juno.com.
